

TRENDS OUTLINE

We used to do SWOT analyses every few years, but they rarely seemed of real use. The breakdown of the Trends Outline, as simple as it looks, got us focused fast. It made us realize we had to do more than just list the issues: we had to make big bet on the few things that could radically transform us.

Introduction

The Trends Outline is an alternative to the SWOT analysis: it deals with opportunities and threats in a structured, sensible way (see the Competitor Grid for strengths and weaknesses). It takes courage to look squarely at the big forces that might make everyone uncomfortable. But of course, it's better to get ahead of trends than have them drown you.

- CUSTOMER DEMOGRAPHICS
- LABOR DEMOGRAPHICS
- TECHNOLOGY
- REGULATION
- MACROECONOMICS
- INDUSTRY CONCENTRATION

Benefits

The Center's tools minimize omissions, improve communications and foster collaboration. The **Trends Outline**:

- Helps the everyone, including the Board focus on the biggest issues
- Ensures your overall plan isn't just reacting to today's problems and markets
- Shows everyone how they connect—and matter to—the world at large

Difficulty	Easy
Estimated time required	2-4 hours
Special skills	None

Instructions

Share one or two provocative articles about the future of your industry (industry associations are often a good source).

1. Brainstorm all the trends that might substantially affect you.
2. Choose those with reasonable probabilities but ignore those of remote possibility.
3. Research the ones that seem most substantial.
4. Then highlight those you feel you must respond to—and then respond to them!
5. Consider assigning someone to be your futurist.
